Did You Know?

California's Inspection and Maintenance Program is being enhanced to include a Low Pressure Fuel Evaporative Test for all vehicles older than 1995 that are subject to the Smog Check program. All licensed inspection stations will be required to support this new regulation by Nov. 1, 2007.

Delphi's EVAP 2010 is designed to offer the necessary tools to support this program, as well as an option to assist in the diagnosis of vehicle systems should they fail. Reserve your EVAP 2010 to ensure your testing station is prepared for these new regulations. **Pre-order your unit today!**

BAR Approved for Quality Testing

Delphi's EVAP 2010 has been submitted for certification by the California Department of Consumer Affairs' Bureau of Automotive Repair (BAR). The system includes all you need to conduct a thorough inspection, including the external filter and regulator, calibration tank, 30-foot coiled hose, low/high calibration valve, filter neck, adapter set, tapered hose plug set and pinch pliers.

Fast, Efficient and Easy-to-Use

The Delphi EVAP 2010 offers fast and efficient leak detection, an easy-to-read diagnostic screen and a fully automated testing procedure. It is also unique in that it is a hand-held portable unit, allowing testing to take place outside of the service bay. The unit guides you through a complete test procedure, using easy-to-follow prompts, resulting in a pass/fail status for the vehicle.

Delphi EVAP 2010

Delphi EVAP 2010 At-A-Glance

- ✓ Low unit price
- ✓ Hand-held portable unit – test can be performed from parking lot
- ✓ Up to 50% faster than the competition
- ✓ Diagnostic software
- ✓ Multi-lingual capability
- ✓ Available cart option
- ✓ Available smoke generator option
- ✓ Built-in ETS communication interface

A valuable manual mode can assist you in the repair diagnosis. An optional smoke generator is also available to further assist you in identifying the specific location of leaks for faster repairs.

Get Ready to Test Today

Regulations require that stations begin conducting these new tests by Nov. 1, 2007. Maximize your station's testing abilities by partnering with Delphi, a leader in evaporative system design for more than 35 years. With the Delphi EVAP 2010, your station can test vehicles quickly and efficiently, increasing bay turns and your customers' happiness.
