

**KYB**<sup>®</sup>  
Our Precision, Your Advantage

Original Equipment  
Shocks & Struts  
for the Aftermarket™

FROM  
**WORLD PAC**

## Why Choose KYB Shocks & Struts?

For the same reasons that the OEM's do...

### KYB Shocks & Struts

- Are manufactured on the same KYB OE assembly lines
- Use the same OE-quality components
- Are engineered to help restore designed performance... not change it

Not Good, Better, Best  
Designed performance isn't a gamble or a guessing game. It's either built with OEM quality & performance... or it isn't:

KYB is.

Original Equipment  
Shocks & Struts  
for the Aftermarket™

Seen this?

This vehicle knows when the shocks and struts under-perform

**ESC** applies individual brakes, slows engine speed and takes control whenever the vehicle begins to lose control or stability. Worn, mis-calibrated or incorrect shocks and struts can cause ESC to engage prematurely and misbehave at critical moments. That's why KYB designs every product with original-design performance-restoring capabilities.

Import, domestic, car, truck, SUV,  
minivans and just about everything else:

*When you want parts that fit and perform  
the way the manufacturer intended...*

You can trust **KYB**
