

ENEOS FULLY SYNTHETIC 0W-20

ENEOS 0W-20 is manufactured for automobiles with factory recommended viscosity of 5W-20 & 0W-20 and is designed to deliver the ultimate fuel saving performance by using JX Nippon Oil and ENERGY's proprietary Zero-Grade Nano Technology additive system.

Blended with high VI base oil and organic molybdenum anti-oxidant, ENEOS 0W-20 provides superior engine protection and durability. Specially formulated additives in ENEOS 0W-20 bond to metal surfaces to form a protective lubricant film protecting the engine even under severe temperature and load conditions.

ENEOS FULLY SYNTHETIC 5W-30

ENEOS 5W-30 Motor Oil is blended with high VI base oil and organic molybdenum anti-oxidant. Motor oil consumption depends largely on the type of base oil used during formulation. ENEOS 5W-30 minimizes oil consumption compared to a conventional 5W-30.

ENEOS Motor Oil is a high performance gasoline engine oil that meets the latest SN/RC standard established by the American Petroleum Institute (API).

ENEOS FULLY SYNTHETIC 5W-20

ENEOS 5W-20 Motor Oil is blended with high VI base oil and organic molybdenum anti-oxidant. ENEOS 5W-20 has been specifically designed for improved engine starting and superior oil-film protection of moving components of the engine at high temperatures.

ENEOS SUSTINA FULLY SYNTHETIC 0W-50

ENEOS Motor Oil 0W-50 offers protection from extreme cold to extreme heat, and everything in between. It is the ultimate 100% synthetic oil for gasoline engines. Applying the advanced oil technology developed for auto racing by JX Nippon Oil and Energy, this motor oil offers an ultra wide 0W-50 viscosity range, providing outstanding performance over the widest operating temperature range.

ENEOS Motor Oil 0W-50 is especially suited for sports cars with large displacements and high output engines.
