

TIME Cards

WORLD PAC now offers time cards that can be used to manage all of the technician time. These time cards accommodate all the processes to include most of the "NP" times (non productive) such as training, vacation, tool maintenance, and most times not chargeable to the customer.

Each job can be stuck on the back of the repair order, as a permanent record of the time each repair took. This allows easy access to keep track of technician productivity. These cards are also valuable to track how much work service consultants are selling.
